About The Author

My name is Solomon Huey and I'm an established online entrepreneur. I make my entire living by working from home and using the internet.

I'm just a regular guy who loves sports, likes to have fun, and happens to make a living on the Internet.

What I enjoy most about making money online is that you can make money while you're out having fun – or even while you're asleep. What makes internet income special is that most of the work can be done automatically and anyone can set up something similar.

You might think you need to be very intelligent and invest thousands of dollars to actually make any money online. The great news is you don't need any of that. I started with less than \$100, a willingness to work, and a dream to make money online.

I want you to know that anyone can have success. I was literally the kid who slept in school almost every day and it seemed like I was destined for failure. The truth is I never believed in the idea of you having to go to school, get a job, and slave away for your boss for the next 40-50 years! Then at age 70, you can retire and begin to enjoy life? I say no thank you to that!

I believe that you are destined to accomplish more in life than work 40 hours a week for 75% of your life! I hope that you can benefit from my experiences, make fewer mistakes than me, and learn to profit from the Internet as I have done.

Please do me a favor, and take the knowledge from this E-book and use it. Do not sit here, read it, and be afraid to take action.

An intelligent person learns from their mistakes. But a wise person learns from other peoples' mistakes. Learn from mine, and you will see success much faster than I did.

If you don't take action, you will never know what your life could have been.

If you have not already done so, please feel free to take a look at my website where you can get everything you need to make money using this report.

You will get a squeeze page, sales page, professional ad copy, and high quality graphics all for free. There will also be an exclusive chance to rebrand this report for insane money making potential. Just go here to get started for free:

<http://www.AutopilotEmpire.com>

What Is In This Report?

I am going to give you some incredibly valuable information behind what I do, and why I do it. Please realize that this is NOT some get rich quick scheme. I'm not going to making some false promise of how you will be filthy stinkin' rich in 30 days! If someone is promising you that, I would suggest you be cautious.

But I WILL give you insight into how I started great business going online, and how you can create your own Autopilot Internet Empire. This is for the people who want to make

more money with their online business and haven't found the success they're looking for.

Although I gave you this E-book practically for free, do not think that this is light in value. The things that I am going to share with you are some of the keys to my success and how I manage to make a full time income online. This can help anyone with the right desire. So make sure you pay attention and try to take as much as you can from this guide!

Why The Internet?

Lets compare a regular store in your neighborhood to selling something on the internet.

First, when you have a business online, it is worldwide! You aren't limited to selling something in your city or even your state. You could make sales anywhere from across the world. That means there is a lot more potential to make money.

I also love online businesses because they are open 24 hours a day, whether you're there or not. While you're asleep, someone could visit your website and buy something. That's even more profit potential.

And the best part of using the internet to make money?

It can run almost on complete autopilot! There are so many valuable, cheap tools out there that do most of the work for you.

When a payment is received, software can automatically send people their products. It can do all of the work while you are out with friends, on vacation, or asleep!

It still amazes me at how easy it is to start an online business where much of the work can be automated.

Plus the start-up costs are incredibly low because you don't have to keep a garage full of inventory, and you don't even have to create your own products. (We'll get more into that in a moment!)

Why Did I Practically Give You This Report?

It's pretty simple actually. You know the answer in the back of your mind, and it is what a lot of other people are afraid to tell you.

I did it to make money.

The difference is I'm not afraid to tell you the truth, and there is a simple reason for that. Because I want you to know that in order for me to make money, I need to help you. The better able I am to help you towards making more sales and reaching your success, the better chances I have of reaching my own success.

If I continually give you great ideas and products that help you make more money with business, would you be open to reading my future messages?

If you do not find this information helpful, you will probably delete this from your computer, and never think about me again.

So which do you think I want to do? Of course I want to help you! If I help you, I also help

myself. The greatest part about this process, is that in the end, everyone gets what they want. I make money, you make money, and we can have lots of happy customers together. In the end, everyone wins!

I could not think of a greater way to do business than to be able to help others while making money for myself. In the book, 7 Habits of Highly Effective People, Steven Covey says the best situation is not a compromise, but when it is a win win situation for everyone.

That's my goal in business, and it will be a key to your long-term business success.

What Is An Autopilot Internet Empire

I fondly refer to a well-planned online business as an [Autopilot Internet Empire](#).

And that's because the internet can be your own kingdom that works FOR you, rather than you working for someone else.

Once everything is set up, almost everything can be done for you on autopilot.

There are a ton of easy to use tools that automate all of the work for you. Payments can be collected and products delivered without you lifting a finger.

And the tools you need are incredibly cheap to the point where anyone can afford to start making money online.

If you were to start a "normal" business with a store front and employees, it could cost you easily over \$100,000 if not more. And that doesn't even guarantee that you will succeed. So I like my odds much better online.

The income potential is also pleasantly high. Remember that businesses like Twitter, Google, etc all started as tiny little companies! If you're goal is to \$1,000 per month, that calculates to a very modest \$33 a day! And of course you can make more if that's your goal too.

Not bad when a lot of the work is done for you.

It's easy to see why having your own Autopilot Internet Empire is a great way to build an additional income stream.

The Mindset

It's important to realize that if you're going to try to make more money online and improve your sales, you will need to invest some of your time and some of your money to be successful.

If you have a bit of extra money to invest, that's great!

If you're short on cash, then I ask you to look at your priorities and what you want for yourself.

Do you eat out a lot? Are you buying things you don't really need? Are you paying for something NOW that isn't really necessary, but you just like to have it? Are you paying more for items than you really need to?

Try spending a little less in other areas and invest it into your future.

The good news is making money on the internet doesn't require \$100,00+ to start! Being willing to invest \$200, \$100, or even \$50 can help immensely to get going in the right direction.

Eating out 1-2 times less per month or not buying that cool looking "widget" won't affect you that much. And that money can go towards building you a better life, rather than making you a little happier for an hour or two.

Even if you have absolutely zero extra cash, you can still succeed online. It will just take more effort on your part to make up for that.

So just to be clear, I'm not asking you to sacrifice everything to make this work. I simply ask that you be dedicated to making your financial future something to look forward to. That may require investing some money and a willingness to put in some effort.

Most would consider that a fantastic deal if it means you can quit your job, set your own schedule, and start enjoying life instead of working for crumbs! But of course that's for you to decide.

Most people could get everything revealed in this report set up in MUCH less than 30 days in their spare time ... yet many people will not. I hope you will be one of the few who discover your full earning potential and have the massive success you desire.

If you are willing to make that commitment to yourself, you are in the right place.

So How Do I Actually Make Money?

There's basically two ways to make money online.

You can sell your own product (and with this report you now have a product to sell!) or you can make money referring customers to other businesses.

For example, lets say you get paid 50% of every sale. If you referred a customer who makes a \$100 purchase, you would receive \$50 for referring that sale.

This is called affiliate marketing.

That means you don't worry about creating or buying a product to sell. You don't need to take care of customer support. And you can start TODAY! You just help others make sales, and you get paid a percentage of the profits.

Because we're trying to make money as soon as possible, I'm a big fan of starting with affiliate marketing if you're still inexperienced with making money online.

What Do I Need?

A Premier or Business Paypal Account

Paypal is one of the easiest ways to accept payments online, and also one of the most well known services that people trust. To accept credit cards, you will want a Premier or Business account, which is free to sign up for:

<http://www.paypal.com>

A Website with Domain Name

Some people debate that you do not need a website, but I say you need one and guarantee you that a majority of the most SUCCESSFUL businesses have a website AND a domain name because it will end up making you more money.

There are literally thousands of website hosts out there, but luckily I know of some great services and they are very affordable:

Domain Names:

[Namecheap](#)

Website Hosting:

[HostGator](#)

Important Note: Although you can buy a domain name and hosting from the same company, it is generally wise not to in case you have difficulties with either company.

Automatic Product Delivery And INSTANT Cash

We can't have an autopilot business without making it automatic!

That's why I really enjoy a service called [PaySpree](#).

This is a powerful tool for both digital product owners and affiliate marketers, and it's free to join.

For product owners, this is an automatic delivery system. People pay you, and PaySpree sends it to your customers for you. It also has some other very cool features for sellers, such as download protection, multiple payment processors, dime sales, and more.

As an affiliate, you will find a ton of products that you can start promoting. And the very cool part about it is that you get paid commissions instantly!

If you're looking for an excellent affiliate program opportunity, you can make money promoting this ebook!

You can visit and join [PaySpree here](#).

There are plenty of other options out there, but personally I have found PaySpree to be one of the best in terms being easy to use, getting paid fast, and you can join for free as both a seller and affiliate.

Autopilot Relationship Building And SALES

Did I mention that much of your online business can be put on autopilot?!

Ever notice a lot of companies like having a way to contact you, such as an email address? The reason they want your email address is that it is much easier to stay in contact and boost sales with a current customer, than advertising to find new ones.

If you know and trust a company, you can feel more comfortable knowing that you will receive what you paid for.

A subscriber list will be one of the most profitable things you can ever have for your internet empire. Big companies like Amazon.com email their subscribers regularly with news, new products, and discounts so that they can get current customers to buy more.

And surprisingly, powerful money-making systems like this can set up quickly and for cheap (starting with just \$1!).

To build your subscriber list, I suggest using an [autoresponder](#).

An autoresponder manages your subscriber list for you automatically. You can set when to email them, how often, plus tons of other automation features, and it will do all the work for you.

You just set it up once, and your autoresponder does the rest!

My favorite autoresponder is [Aweber](#).

How Do I Advertise?

There are many ways to advertise, but I prefer to stick with something easy, fast, and affordable. That way you get money coming your way early, then you can worry about the more advanced advertising methods later.

I actually already have a free report at my website [List Recon](#), which explains how to get effective advertising and visitors coming to your sites starting today.

You can [claim your free advertising report by clicking here](#).

Be Patient

Your sales may not explode right when you start. Some days you may only make \$5, other days it may be \$100. Don't worry if you have a slow day, that is a part of doing business.

Remember that you are still learning. If you happen to make a mistake somewhere, move on and be sure to learn from it. Just focus on making every day count and finding ways to improve your business.

My #1 Rule

This is my #1 rule that helped me achieve success online and I want you to make sure you follow it. It can be the difference between failing and making a significant living with your business...

Never give up!

Simple, right? Now why would I be telling you the obvious? It's because I went through it rough, success did not just come to me in an instant. It usually doesn't happen that way in fact, contrary to what you may have been told elsewhere.

I didn't have anyone to guide me through the steps like you do. If I had given up, I never would have made it to where I am today.

Can you handle making practically zero money while working hard for several hours almost every day? Well those early months were really disappointing for me, because I had put so much work and so much reading, but made so little. I wanted to quit so many times, but I knew I had the ability to succeed.

The one thing I did during that time was I kept trying to learn everything I could. I'd apply every trick I uncovered. Do you know what happened after that? My sales began to SKYROCKET!

Why was I able to do this? I followed my #1 rule:

Never give up.

Conclusion

What I shared with you today is a great foundation on how I've managed to build a real business online. You now have inside information on how I view the industry, as well as some of the keys to my success. To me, the mind is just important as the how to, because without the right desire and mindset, it's hard to succeed.

If you were given this report from somewhere other than me, I suggest going to [my website](#) where you can get everything you need to start making money with this report.

While you already have the Autopilot Internet Empire report, you can sign up for updates and the exclusive chance to rebrand this report for even bigger money making potential and viral profits. This is ONLY available to my subscribers.

Just [click here](#) to get started for free.

You will also get a squeeze page, professional ad copy, and high quality graphics all for free. Creating something like this on your own could easily cost you hundreds or thousands of dollars and countless hours of work.

I will also regularly share with you my expert advice on the latest tactics to increase your profits online. And having an experienced business mentor passing along tips to you is priceless.

So yea, if you're not registered yet, don't wait any longer! =) It's free and there is a ton for you to gain.
